Henrique Felix

Full Stack Developer | PHP | Laravel | React JS | React Native |
VueJs
Lagoa, Faro, Portugal

Summary

Welcome to my LinkedIn. My name is Henrique Felix, I'm Brazilian but I currently live in Portugal. My expertise lies primarily in back-end development using PHP and Laravel, complemented by strong knowledge of modern front-end technologies such as React & React Native, Livewire, and Tailwind CSS. I started programming at sixteen, transitioning from sales to IT in the same company where I continue to work today. Over the years, I have developed dashboards, administrative systems, and full-scale platforms focused on performance, reliability, and clean architecture. Currently, I am expanding my toolkit with Python, focusing on AI-driven automation and content indexing through RAG (Retrieval-Augmented Generation). I am particularly active in building CLI tools and scripts (TypeScript) to streamline workflows, with a strong emphasis on Open Source tools (open code agentic cli). I am deeply passionate about programming and the autonomy it offers — constantly learning, exploring new technologies, and improving my craft.

Experience

C-MORE | Beyond the Obvious
Full stack developer
June 2023 - Present (3 years)
Portugal

Led backend architecture decisions and defined technical standards across the team.

Designed and maintained scalable Laravel-based systems with complex business logic.

Improved API and database performance through indexing, query optimization, and caching strategies.

Implemented secure authentication, encryption practices, and role-based access control.

Mentored 4+ developers, standardized code review processes, and improved code quality through stronger testing practices.

Structured staging and production deployment workflows, reducing release-related issues and improving system stability.

Viasat telecom

Desenvolvedor de software

March 2018 - June 2023 (5 years 4 months)

Bebedouro, São Paulo

Manutenção de web sites ;

Fornecimento do software de CRM para controle de vendas;

Gerenciamento da rede local;

oseubackoffice.com

Full-stack Developer / Team manager

July 2019 - May 2023 (3 years 11 months)

Guia portugal

Designed and maintained a Laravel-based backend powering a real-time logistics platform.

Built and optimized RESTful APIs consumed by a React Native mobile application used by

500+ active drivers handling real-time and scheduled requests.

Supported a web coordination platform with 1,000+ users managing drivers, live geolocation,

and route monitoring integrations with mapping services. •

•

Implemented caching strategies and database optimizations to ensure stable performance

under continuous real-time updates.

Managed staging and production environments, ensuring high availability and reliable

deployments

VTT LINK

Técnico de telecomunicações

March 2019 - July 2019 (5 months)

Lisboa e Região, Portugal

Instalações de routes , switchs , sistemas 4g , sistemas de telefonia IP e analogico.

Varejo Inteligente

Programador FullStack

January 2019 - July 2019 (7 months)

Bebedouro e Região, Brasil

- Desenvolvedor Fullstack.
- Desenvolvimento de Api`s.
- Gerenciamento de banco de dados
