ABOUT MYSELF

I am a Full Stack Developer with 7+ years of experience in designing, building, and deploying web applications.

My expertise lies primarily in back-end development using PHP and Laravel, complemented by strong knowledge of modern front-end technologies such as React & React Native, Livewire, and Tailwind CSS.

I started programming at sixteen, transitioning from sales to IT in the same company where I continue to work today. Over the years, I have developed dashboards, administrative systems, and full-scale platforms focused on performance, reliability, and clean architecture.

Currently, I am expanding my toolkit with Python, focusing on AI-driven automation and content indexing through RAG (Retrieval-Augmented Generation).

I am particularly active in building CLI tools and scripts (Typescript) to streamline workflows, with a strong emphasis on Open Source tools (opencode agentic cli).

I am deeply passionate about programming and the autonomy it offers — constantly learning, exploring new technologies, and improving my craft.

WORK EXPERIENCE

C-MORE - Portugal, Lisbon

Website: <https://thecmorecompany.com>

Full Stack Developer

[01/06/2023 - Current]

- Responsible for creating scalable web systems, defining team standards, and guiding key technical decisions focused on architecture and clean design.
- Develops and maintains backend systems with Laravel 10+, building efficient APIs, complex business features, and managing secure integrations.
- Delivers clean, testable code through automated tests, TDD, code reviews, and performance optimizations.
- Designs and optimizes MySQL database structures, focusing on performance, caching, and security for stable operations.
- Implements secure authentication, encryption standards, and role-based access control (RBAC), performing regular audits to protect data.
- Guides and mentors developers, leads architecture discussions, and ensures clear documentation and collaboration across teams.
- Identifies and resolves system bottlenecks, improving API and database performance through indexing and load management.
- Produces technical documentation and maintains transparent communication, reporting progress and supporting planning within agile workflows.
- Led backend architecture decisions and defined technical standards across the team.
- Mentored 4+ developers, standardized code review processes, and improved code quality through stronger testing practices.
- Structured staging and production deployment workflows, reducing release-related issues and improving

system stability.

Oseubackoffice - Portugal, Guia

Website: <https://oseubackoffice.com>

Full Stack Developer

[01/07/2019 - 30/05/2023]

- Optimized frontend and backend systems to enhance SEO performance and security through best development practices.
- Designed and implemented web applications, including news platforms and online content editing tools, tailored to client needs.
- Collaborated with focus groups to analyze consumer expectations and improve product usability.
- Designed API models and developed a complete API ecosystem to support scalable integrations.
- Developed and maintained high-performance React Native applications.
- Mentored new employees in Laravel Framework mastery and coding standards.
- Performed thorough code reviews to maintain quality and consistency across projects.
- Managed local, staging, and production environments, ensuring high availability and reliable deployment processes.
- Designed and maintained a Laravel-based backend for a real-time logistics platform.
- Built and optimized RESTful APIs for a React Native mobile app used by 500+ active drivers for real-time and scheduled requests.
- Supported a coordination platform with 1,000+ users, featuring live geolocation and route monitoring integrations with mapping services.
- Implemented caching strategies and database optimizations to ensure performance under continuous real-time updates.

Varejo Inteligente - Brazil, Bebedouro, São Paulo [Remote]

Full Stack Developer

[01/01/2019 - 31/07/2019]

- Full Stack Developer responsible for developing and maintaining APIs and managing databases.
- Provided regular progress updates and detailed reports to lead software engineers and IT managers.
- Ensured timely delivery of tasks and maintained clear communication across all project phases.

VIASAT - Brazil, Bebedouro, São Paulo [Remote]

Full Stack Developer

[01/03/2018 - 30/05/2023]

Worked in a remote capacity with a monthly hourly contract, focused on resolving specific issues and implementing targeted features.

- Designed and developed a full-featured CRM as a solo developer, marking my first large-scale production project using Laravel.
- Built a sales and customer management platform covering the full commercial lifecycle, including lead tracking, sales control, post-sales back-office, and performance monitoring.
- Implemented SMS notification workflows, sales target tracking, and internal dashboards to support business operations.
- Engineered the platform using Laravel and MySQL, ensuring long-term stability and maintainability.
- Deployed and operated the environment on DigitalOcean using Docker, Redis caching, background jobs, and queue workers.
- Delivered a production-grade system that remains in use, demonstrating ownership and long-term operational reliability.

VIASAT - Brazil, Bebedouro, São Paulo

IT Technician

[01/07/2013 - 31/03/2018]

- Maintenance and administration of Windows and Linux servers.
- Setup and management of terminal services and local networks.
- Development and maintenance of company websites and internal applications, including a CRM for sales control.
- Managed the company's Facebook page to support its online presence.

EDUCATION & TRAINING

Sistemas de informação

Centro universitário Unifafibe [01/01/2015 - 31/07/2017]

City: Bebedouro | **Country:** Brazil

Website: <https://www.unifafibe.com.br/> | **Field(s) of study:** Sistemas de informação:

The Information Technology program trains professionals to develop, manage, and maintain computer systems and digital infrastructures.

It covers programming, networks, cybersecurity, databases, and project management.
